SUMMARY

Digital Technologies graduate specialising in Cyber Security and current Amazon associate with over eight years of operational experience. Hands-on end-user support experience as a volunteer IT Technician at Global Banking School, troubleshooting PCs, laptops, printers, Microsoft 365 and basic network issues. Experienced in resolving system and workflow problems, prioritising tasks in fast-paced environments, training colleagues, maintaining accurate records, and escalating unresolved issues. Currently completing an IT Computer Support Specialist programme and seeking to apply my technical knowledge, customer-support skills and site experience in the LBA4 Step-Up IT Technician role.

TECHNICAL SKILLS

End-user support: Hardware and software troubleshooting, clear guidance and practical support for users

Systems: Windows 10/11, Windows Server, Microsoft 365, user and group administration, access permissions, PCs, laptops, printers, virtual machines

Networking and IT foundations: TCP/IP, IPv4/IPv6, DHCP, DNS, default gateways, basic subnetting, routers, switches, Wi-Fi, operating-system fundamentals

Cloud and security: AWS EC2, S3, IAM, security groups, role-based access, encryption, key management, cybersecurity fundamentals

Development and collaboration tools: Git, GitHub, Visual Studio Code, Trello, Asana, Agile practices

CORE COMPETENCIES

Service and communication: Active listening, clear communication, customer care, patience

Professional strengths: Problem-solving, attention to detail, initiative, adaptability, teamwork

EXPERIENCE

Amazon • UK

Warehouse Operative | Instructor | Problem Solver

Oct 2017 - Present

- Resolved order discrepancies, system errors, and workflow issues in real time, investigating causes and taking accurate corrective action.
- Delivered inductions, onboarding and cross-training to approximately 200 colleagues, adapting explanations to different learning needs, and checking understanding.
- Conducted quality and process audits, maintained accurate records, and identified areas requiring further training or improvement.
- Collaborated with ICQA, colleagues and management to resolve operational issues, respond to stakeholder needs, and support performance targets.
- Prioritised real-time tasks in a high-volume environment, maintaining accuracy, and helping minimise workflow disruption while meeting strict deadlines.

Global Banking School • UK

IT Technician (Volunteer)

March 2025 - April 2025

- Resolved day-to-day technical issues for students and staff, explaining solutions clearly and helping users continue their work with minimal disruption.
- Diagnosed hardware and software problems across PCs, laptops and printers, escalating unresolved cases appropriately to support timely resolution.
- Guided users through Microsoft 365, document formatting, printing and online submissions, helping them complete academic tasks accurately.
- Performed basic network troubleshooting and followed security, privacy and data-handling practices to support reliable access and protect user information.

EDUCATION

Correlation One

IT Computer Support Specialist

July 2026 - Present

Global Banking School

HND in Digital Technologies (Cyber Security) - Merit

Jan 2024 – Dec 2025

OpenClassrooms

Web Development Diploma

Dec 2022 – Dec 2023

ATHE

Level 3 Diploma in Business and Management

Aug 2022

ICS Learn

Level 3 Diploma in Human Resources Practice

July 2020 – July 2021

TECHNICAL PROJECTS

IT Infrastructure, Cloud, and Development Projects

HND Digital Technologies & OpenClassrooms

Dec 2025

- Configured a Windows Server environment using virtual machines, creating user accounts and groups, assigning permissions and testing access controls.
- Designed logical and physical business networks in Cisco Packet Tracer using routers, switches, DHCP services, and departmental workstations.
- Developed AWS cloud-security architectures covering IAM users, groups, policies, role-based access, EC2, S3, encryption and key-management principles.
- Built an employee social-network application using HTML, CSS, JavaScript, Vue.js, Node.js, Express, MySQL and MongoDB, including authentication, profiles, posts and user interactions.
